## SUMMARY

A self-driven and meticulous Software Engineering graduate proficient in React.js, Node.js, Express.js, MongoDB and React Native,. Seeking a full-time MERN stack Internship or developer position to enhance full-stack development capabilities. Eager to learn and contribute to innovative projects while refining skills in building scalable and responsive applications.

## EDUCATION

BS in Software Engineering

International Islamic University Islamabad

📅 09/2020 - 08/2024

CGPA

3.6 / 4.0

## EXPERIENCE

Frontend Developer

Code Alpha

📅 11/2023 - 12/2023 📍 Remote

- Developed proficiency in HTML, CSS, and JavaScript basics while completing various tasks. Contributed to frontend development projects, enhancing user interface functionality and design.

## PROJECTS

Lively

📅 02/2024 - 06/2024

🔗 <https://github.com/realAhsan/FYP>

Bus Tracking System using MERN stack and React Native

- Developed two mobile applications (User and Driver) using React Native and Expo for real-time bus tracking.
- Created an admin dashboard to manage users, drivers, busses and routes using React and Material UI to manage and monitor the system.
- Implemented the backend with Node.js, Express, and MongoDB for efficient data handling.
- Created and Integrated REST APIs for seamless communication between applications and backend services.
- Utilized real-time tracking to display bus locations on a map.
- Implemented user authentication and notifications to enhance user experience.

Maxflow

🔗 <https://max-flow.vercel.app/>

Task Management System using MERN

- User Authentication and authorization.
- Task Management: Add, edit, and delete tasks
- Scrum Board: Drag and drop tasks between stages (To Do, In Progress, Review, Blocked, Done).
- Responsive Design: Works seamlessly on all devices.
- Real-timeStatus Updates: Immediate reflection of task statuses and updates through drag and drop.

Recipe Finder Web App

Recipes website created using JAM Stack

- Developed a web application using JavaScript to help users search for and discover recipes.
- Integrated a third-party API to fetch and display a wide variety of recipes based on user input.
- Enabled users to add their own recipes to the platform, fostering a community-driven experience.
- Implemented bookmarking functionality, allowing users to save their favorite recipes for easy access.
- Focused on creating a user-friendly interface and seamless interaction for an enhanced user experience.
